

Improve Your Eyesight Naturally

I don't know about you, but I've been searching for a way to rid myself of ghastly vision related problems for decades now. I tried everything in the dictionary, from getting prescription glasses to contact lenses and even undergoing **Lasik surgery**! I practically exhausted a large portion of my life savings as well on all the aforementioned treatments too. Having to part with my hard-earned cash would have been an acceptable trade-off had the treatments actually worked, because as it turned out, none of them did me any help at all!

I was beyond furious and was on the verge of going insane! Just think about it, hundreds of thousands of dollars just going down the drain, with no foreseeable way to recovering any of it in the near future. I started with expensive prescription glasses before moving on to contact lenses that cost me a bomb to replace every month or so. In fact I was alternating between my glasses and contacts because neither was the perfect fit for my eyes that they were promised to be by every optometrist I went to. The glasses were really tacky and did my poor vision no help whatsoever. Contact lenses were constantly irritating my cornea and even caused my eyes to get swollen because dirt trapped under my contacts caused infections!

I looked absolutely ridiculous going into office with my swollen eyes and people were avoiding me like the plague! I was petrified upon looking into the mirror at myself because my eyes were red as an apple! I had enough and decided to take the plunge by going for **Lasik surgery**. Based on my knowledge and the advice of others, I truly believed it would finally give me natural clear vision. But was I in for the rudest shock of my life. Believing that my **poor vision** was but a thing of the past, I walked out of the operating room like a

brand new person. Little did I know that the vision in my right eye would start to deteriorate by the week's end. I suffered from dizzy spells and migraine related headaches on a regular basis. During a check-up at my local optometrist, I was told my right cornea was severely damaged as a result of the **Lasik surgery**. Refusing to believe him, I went to several other optometrists who gave me the same verdict! I'd have to spend another 20 grand on a cornea transplant operation!

I was at my wit's end, because I simply could not afford to spend that kind of money as I had so many loans and my credit card debt to pay off! At the same time I could not just watch and allow my vision to deteriorate further could I? I was at the lowest point of my life and suicidal thoughts started to enter my mind. But I discovered **Natural Clear Vision** and my life would never be the same again! I was initially skeptical after being introduced to this product through a friend who told me how all his vision related issues, including near-sightedness and lazy eye, were now a thing of the past thanks to his product! I couldn't bring myself to trust him because of my past experiences. But I heard a few more success stories from others that I knew so I finally decided to make the plunge for **Natural Clear Vision**!
